

# THE LEECHES CALL

VOLUME 45 NO. 24

Authorized as second class mail, GLEICHEN, ALBERTA, WEDNESDAY AUGUST 27, 1952  
Post Office Department, Ottawa.

SUBSCRIPTION \$2.00 PER YEAR

## Town & District

Mrs. Hall of Cardston is visiting her daughter and son-in-law, Mr. and Mrs. C. Nelson.

There's a remedy for cluttered attics and empty purses—a classified ad in The Call.

Ed Taylor has returned from his trip to points west. He returned Monday morning and is back on his job as assistant to Town Engineer Jack Lester.

Mr. and Mrs. G. E. Bell, Mr. and Mrs. Jack Bell and Mrs. B. McMillan have returned from an auto trip to Pocatello, Idaho where they were guests of Mrs. McMillan's 88-year-old sister.

The boys who sell farm machinery are very busy these days selling combines or repairing old ones. Wherever one goes for a drive in a car combines are to be seen moving over the roads evidently found for some farm. This year's crop is ripening fast and soon the farmer will be busy harvesting.

Mr. and Mrs. N. A. Riddell have returned to their home in Cardston after spending a holiday at Gimli, Manitoba, Boutheneau N. D. and other points of interest.

The choir in the little country church was practicing a new anthem, "The Tenors' Song," cautioned by choirmaster, "the tenors will sing alone until we come to the gates of hell. Then you all come in."

Mr. and Mrs. Don Bond and two sons spent a couple of days in the district last week visiting Mr. and Mrs. LeRoy Koefod. Mr. Bond was for several years manager of Shorline Station. He moved away from Gleichen about ten years ago. He now has a store in Champion.

Mrs. Holden of Mannville, Alberta, is at present visiting her sister Mrs. R. S. Hasky.

While away on a short holiday Hagen James hired man stole his car. The car was found several days later in Brooks somewhat damaged. It appears to have been used since then and side are bashed in. To date the hired man has not been located.

Miss Joan and Jean Perry of Nordsborg, Alberta are holidaying with their aunt and uncle, Mr. and Mrs. Stan Hall visiting about a week.

The holiday season for both young and old is about over. Those who are fortunate enough to have their holidays in September should be able to enjoy them better than in July and August since they will not have to worry about getting accommodation at the various resorts as the rush is over. Most parents with children are busy with the end of the school year and so on hand with the opening of school.

A dignified Briton was taking home a pair of his wife's shoes when the shoemaker had repaired. No wrapping was supplied, of course, and he was carrying them loose. A man opposite him on the bus watched closely and said as he got out, "Not going to let her get ahead, are you, governor?"

Miss Heather Holland accompanied her uncle and aunt, Mr. and Mrs. A. Ferguson on a motor trip to Montana recently.

## STORING GRAIN ON THE FARM

Farmers will store a good deal of grain on their farms for some considerable time before it can be hauled to a country elevator for sale. The following advice is tendered by Dr. H. E. Gray, head of the Stored Products Insect Investigations, Dominion Department of Agriculture, Ottawa.

A granary with wooden floor above the ground is best for farm storage, and several small granaries are better than a large one for long term storage. If tough damp, weed-infested ground must be stored, keep it in small bins and mark it off. Carry out the following procedure:

Repair leaky roofs, windows, and doors to exclude rain and wind. If the granary floor is of concrete, cover it with moisture-proof paper. Clean walls and floors thoroughly. Spread a little kerosene, lime over the floor, and sweep it about to fill

## LARRY HENDERSON

After the Second Great War Larry Henderson set out to see the world as a foreign correspondent, with a passport to adventure. He travelled through 30 countries in Europe, the Middle East and the Far East. His object was to observe all aspects of life and to record conversations, interviews, folk songs, dances and music. His wife Joan, formerly of

CBC engineering division, who accompanied him on most of these travels, made the recordings possible. The result is a series of travel diaries called Passport to Adventure, which Henderson broadcasts Tuesday nights on CBC 8:30 p.m. Here the Hendersons are with the tape recording machine that captured foreign sounds and voices for Canadian listeners.

If insects or miles were present last year, coat the inside walls with whitewash containing one-quarter of a pound of fly per gallon. Fill vases or jars to the plate only. Ample space between the grain surface and the roof must be provided for ventilation. Even bins or piles are risky. If available, place on well drained ground or two or three feet of straw. Piles should be uniform cones—World of Wheat.

## ITEMS OF NEWS OF GLEICHEN AND VICINITY

A zone meeting of all the branches of the Canadian Legion will be held in the Legion Hall August 28. There will be representatives here from Brooks in the east to Rockyford. It is expected there will be a large attendance of members.

United States authorities have warned Canadians not to look forward to an early lifting of the cattle embargo. It is likely that the full run of cattle in C. country will have to find a market elsewhere.

A pleasant afternoon was spent recently when Mrs. N. A. Riddell invited the neighbors in her vicinity for a social afternoon in honor of Mrs. W. Pettit who will be moving into their new home in Gleichen. Mrs. Pettit presented Mrs. Pettit, the honored guest, with a small gift of her new neighbors. A host of good wishes were extended from each and all to go with her to her new home. Mrs. Pettit in a pleasing manner thanked her friends for all their kindness.

The irrigation project south of the river known as the Bow River Irrigation project will be completed by 1954 according to information received. Storage in Lake McGregor will be increased by 300,000 acre feet by new year and the Farmers' dam should be completed by the following year. Enlargement of the Ronalde Canal will be finished some year.

Mr. T. B. Northfield, Optometrist, will be at the Queen's Hotel in Gleichen on Thursday, September 4th, for the purpose of examining eyes, etc. Calgary office: 514 Greyhound Building.

The Communists had hard going in the recent provincial election. They got only 1118 votes in the contest out of 63,419 ballots. Ben Swaney got 824, Arthur Roberts 301, Frank Maricle 298 and Arthur Wray 419.

The initial marketing quotas this season will be five bushels per seedling acre for wheat and four bushels for barley and oats. It looks as though money will be a little scarce this fall.

The grain crop on the prairies will likely break all records. It is estimated that well over 600 million bushels of wheat will be harvested.

Doctor: "Your husband must sleep quiet and rest. Here's a sleeping powder." Wife: "When do I give it to him?" Doctor: "Don't give it to him. Take it yourself."

First there is beauty of the senses, the joy that comes from loveliness of color, line, form and tone. A second aspect of beauty exists in the understanding of its origin and being of Nature (including human beings). This constitutes science. The third form of beauty lies in seeking the meaning of beautiful things we see, and the purpose they express. The deeper and farther we go in the search for beauty, the higher we rise beyond the physical and sensual to the spiritual sphere.

Beauty contains the seeds of happiness—that desire, wish of every human being. Happiness and beauty are closely intertwined. In our social life we try to make our surroundings, manner and conversation pleasing. We do not wish to expose the duller portions of our lives to the public eye. In the books we read, in the plays we see, in the films we see, we all desire the happy ending, and we are slightly disappointed and "let down" if things do not end well. In enjoying the beautiful, we increase our own happiness.

This cultivation of love of the beautiful is not a special privilege, the preserve of the few or the possession of a caste. Beauty is ours to enjoy without money and without price—reversing joy within the reach of all. It has nothing to do with technical ability or wealth or high education.

Everyone of us is capable of creating beauty in one form or another, and of appreciating it even more widely. The woman taking a well-baked loaf out of the oven, the man gathering vegetables from the garden he has carefully tended, the mother tending a store for her children, and the employer who makes a congenial working atmosphere for his employees—all of these are creating something that is beautiful. Beauty can be small but it can never be insignificant if it adds to the enrichment and dignity of human life.

It has been truly said that beauty is in the eye of the beholder. Indeed, it is comforting to know that by some divine atomization, each one of us is supremely beautiful in the eyes of another. But perhaps in no sphere is there such latitude of choice or expression of individuality as in the realm of beauty. What seems beautiful to one person does not appear so to another—and here you have the yardstick of taste.

In our choice of the beautiful, familiarity plays a big part. We all cherish scenes and memories which are dear to us, the "old" eye, to strengthen and uplift us, and on these future choices of the beautiful are based. These things of beauty like a great affection, a clear thought, Continued on last page)

## Start Them Young

Junior farm club work is rendering a practical service to Canadian agriculture. The organization and its leadership train young people in the best farm practices and home economics, which lead to "self-help and community betterment".

The Canadian Bank of Commerce has pleasure in sponsoring this new booklet, in recognition of the valuable work being done by the Junior farm clubs across Canada.

You can help to widen the usefulness of this organization by taking an interest in its work, and giving it your support and encouragement.

## Highway Accidents Climb

Pages of newspapers are peppered more than usually this season with stories of pile-ups of cars and trucks on highways. The most spectacular such multiple accident on the Queen Elizabeth Way, in a heavy flow of traffic, a foolish motorist stopped suddenly. The car following on its bumper, plowed into him and so on down the line. The motorist following the car in the mess and started traffic moving normally again, a total of approximately \$30,000 damage had been caused to scores of vehicles.

Such accidents are attributable directly to the desire of the driver to drive fast. We scarcely notice the small fundamental common sense rules to be followed by every driver. The first never stop suddenly on a highway, and if possible never stop at all on the pavement but pull off to the side before doing so. Because of the narrowness of the shoulders along our paved roads and their lack of gravel it is not a safe practice to drive off the pavement before halting. The prevalence of this type of highway mishap suggests that the department of highways could well give motorists a course in widening the shoulders and graveling them.

Another wise precaution is for every driver to assume that the one ahead may stop suddenly. Tests have established that a car proceeding at 50 miles per hour travels 188 feet on dry pavement after the brakes have been applied before coming to a stop. At this high speed, the vehicle goes 55 feet before a vigilant driver grasps the danger and applies the brakes. So, it is, it travels 243 feet from the time the driver is sensed by a wide-awake driver until it has been halted. This distance is reduced considerably at 20 miles per hour, even then it is 52 feet. Some books on driving hints suggest that there should be at least a car length for every 10 miles of speed between vehicles. While at this it is a safer procedure than virtually touching the bumpers of the car ahead, there should always be stretched somewhat for complete safety.

Something to remember is that visibility range is sharply reduced at night. The limit with the best of lights is about 150 feet. Since it takes 243 feet to stop a car at 50 miles an hour after danger has been realized, there always is the possibility that at this speed a car cannot be halted at night in time to avoid crashing into a slow moving or stationary object ahead, particularly if the lane for approaching traffic is filled. Hence, a wise motorist drives at a slower speed after dark.

## The Coronation

LARGE NUMBERS OF CANADIANS are planning to visit Britain next year and to attend the coronation of Her Majesty, Queen Elizabeth II. This historic event, which is already attracting widespread interest, is the thirty-eighth coronation to take place in England since the Norman conquest, and it is the fifth one to be held in the month of June. The British Ministry of Information has recently published some interesting facts concerning the coming coronation and the pomp and tradition which surrounds it.

### Usually Held On A Sunday

Until the eighteenth century, we are told, the coronation usually took place on a Sunday or "some other solemn feast day," but for the past two hundred years this custom has been disregarded. Queen Elizabeth I was crowned on a Sunday but the coronation day of Elizabeth II will fall on a Tuesday. The crown, which is the central symbol in the ceremony, is the Coronation crown, the crown of St. Edward. This crown has been worn by every sovereign since the time of King Charles, except at the coronation of Queen Victoria. On that occasion, the Lord Steward carried the Coronation crown throughout the ceremony, and the Queen wore the lighter Imperial crown, said to be the most beautiful and valuable crown in the world. It has not been decided yet whether Queen Elizabeth will follow the precedent set by Queen Victoria in this regard, or whether she will choose to have the Coronation Crown used in the ceremony.

### Event Of Color And Pageantry

These and many other historic symbols will play a part in the proceedings which will mark the coronation of Elizabeth II, the first Queen to be crowned since Victoria became Queen on June 28th, 1838. As Princess Elizabeth has a familiar and beloved figure to the people of Great Britain, the Commonwealth and Empire, and the formal beginning of her reign will be a happy occasion. Great Britain has endured war and serious reverses to the throne in the last two decades, but the coronation will be a colorful and joyous occasion and it is to be hoped that the reign of Her Majesty Queen Elizabeth II will bring peace and prosperity to her people.

### Oil Boom Spreads To Areas In North West Territories

EDMONTON.—The oil boom which began five-and-a-half years ago near Edmonton is still spreading. Besides all of Alberta, Saskatchewan and Manitoba, and north-central British Columbia, the search is now taking in some 10,000 acres of the North West Territories. That is about the same as the amount of land under exploration on the prairies the year before the Leduc discovery. It is a very large acreage for such a remote region, and may be taken as evidence of the vitality of our oil development.

### EXHIBITION HAD TO CANCEL CAMEL ACTS

VANCOUVER, B.C.—The law kept camels out of Canada recently. Several of the hump-backed "ships of the desert" were scheduled to perform at the Pacific National Exhibition. An official said the act was vetoed because American regulations enforced after Canada's outbreak of foot and mouth disease would prevent their return to the United States.

## Patterns

Fast! Light! Warm!

"Women don't interest me. I prefer the company of my fellow men."

"I'm broke too."

Teacher: "What is a privates?"

Pupil: "Piss, sir, it's what you lend to anybody when they're going to tell you a secret."

"She's the girl of the gab—you've no idea! Her father was an auctioneer, and her mother was a woman."

"I hear Smith called you an idiot."

"Only in a roundabout way. He said that in the matter of intelligence you and I had nothing to quarrel about."

"Yes, I'm a cosmopolitan. My father was Irish, my mother Italian. I was born in a Swedish ship off Barcelona and a mean named McTavish."

"What's McTavish to do with it?"

"Why, that makes me of Scotch extraction."

An official conducting a Government quiz called on Mrs. Jones and asked her what she did with herself all day.

"I keep the house clean, cook all the meals, do the dishes, do all the laundry, mend the clothes and make an entry in his notebook: Mrs. Jones—Housewife—No occupation."

"Why do they put bridges on violins?"

"To get the music across, I guess."

Downstairs: "Didn't you hear me pounding on the ceiling?"

Upstairs: "Oh, that's all right. We were making a lot of noise ourselves."

NOT EXACTLY FRIENDLY.—"Bom-bom save me" seems to be the distressed reaction of 14-month-old John Bader, of Farmington, Minn., as a rabid mascot his rock. The bunny was one of several entered in the Dakota county fair by John's father, but the youngster apparently hasn't become used to the animals and became very vocal in his protest.

## U.S. Will Not Hurry To Lift Cattle Embargo

OTTAWA.—The Canadian Government planned a quiet patient wait for the United States to remove its six-month embargo on Canadian livestock and meats.

With foot-and-mouth disease eliminated, the Government officially declared Canada free of the tenuous virus and immediately informed U.S. authorities.

"But we don't plan to bring any pressure on them to remove the embargo," an official said. "We know the U.S. Government will consider the matter carefully and reasonably and act as quickly as possible."

Canada appeared to be in for a long wait. A Washington dispatch quoted Acting Chief S. O. Fildes of the Agricultural Department's Bureau of Animal Industry as saying the U.S. will take no immediate action.

The American fear, as far as it could be ascertained here, is that the virus may still be lurking in some Canadian food locker. Until that fear is dispelled, it appeared the embargo will remain intact. Another view is that the U.S. will not act until after the U.S. presidential election in November.

Meanwhile, south Saskatchewan farmers in the former infected area, their activities curtailed since quarantine and buffer-zone controls were imposed Feb. 25, were free to restock farms with new livestock.

The official declaration, issued under the name of Agriculture Minister Gardiner, said all restrictions on movement of livestock throughout Canada and all precautionary measures against spread of the disease in south Saskatchewan have been removed.

### WILL AWARD SCHOLARSHIPS

The government of India will award 10 scholarships to blind students seeking higher education or advanced vocational training. The scholarships will provide certain courses that are not available in institutions for the blind.

**QUEEN MARY HELPS AT CHURCH BAZAAR**

SANDRINGHAM, England—Queen Mary, 85-year-old grandmother of England's reigning Queen, sold £50 worth of goods in 90 minutes behind the fancy articles stall at a church bazaar here. She left the stall when there was nothing more to sell.

## Supersonic Waves May Speed Germination Of Barley Seeds

EDMONTON.—Barley seeds and supersonic waves seem a queer combination, but the alliance could be a potent one if the experiments of George Obelenksi prove successful. Already, tests being carried out by Obelenksi in a laboratory of the University of Alberta's plant science department have proven that supersonic waves can be made to speed germination and growth of plants.

The "quinea pigs" for most of the experiments so far have been barley seeds but there's no reason, says Obelenksi, why the treatment could not be applied to almost any plant.

The linking of supersonic vibrations and plants is entirely new field and the Russian-born scientist says the surface has hardly been scratched yet although an encouraging start has been made.

In his experiments, he is using an ultrasonic generator, imported from Germany and used widely in a type of medical "deep massage" treatment for humans.

It sets up sound vibrations at the rate of 80,000 a second. This speed can best be imagined when one considers that the human ear can hear vibrations up to only about 15,000 a second.

Dr. Johnson feels it would cost far more than it is worth to treat enough seed for a barley crop.

Born in Moscow, Obelenksi left Russia in 1920 after the revolution and has since gained agriculture degrees at the University of Yugoslavia and Vienna.

He won his bachelor of science degree at the University of Alberta last year.

**Alberta Farmer Develops Fast Growing Wheat**

EDMONTON.—An Alberta farmer has developed a strain of wheat which may be the answer to the short growing season in northern Alberta.

A. W. Manchester of the Jarvis district, 80 miles northwest of Edmonton, says his wheat called "Early Harvest" matures two to three weeks ahead of other crops seeded at the same time under the same conditions.

His wheat, developed by years of patient cross-breeding, heads out seven weeks after planting and yields 40 to 45 bushels an acre. Sixteen turning varieties used by Manchester yield 60 to 70 bushels.

**IRON-HORSE**

Gov. Henry F. Schricker of Indiana, a former farmer, doesn't want to leave to carry him to the cemetery when he dies. "When they carry my dust over that hill in the west," he told a convention of farmers here, "I want that last ride to be in a fire truck. I want to be a fireman till I die."

**ARE GOOD EATERS**

Young birds consume more than their own weight in food daily during their period of maximum growth.

## OUR COMPLETE SHORT STORY—

## WANT-AD WIFE

By GEORGE ENRICH

Nora Was in a Good  
Spot To Get Her Man.

NORA reached over the counter and seized the sheet of paper from his tanned, muscular hands. "Is this the way you want your ad to read?" she asked, smiling up at his embarrassed face. He nodded, swallowing hard. Nora read it aloud. "Veteran, 37, wishes to meet respectable girl about same age with intention to marry and settle down. Have summer resort, no debts, lots of ambition. Please write, enclosing snapshot."

Nora bent over the counter, making the twinkle in her eyes. "And you want this to run in the Sunday newspapers?"

"Yes, ma'am, and please leave all the letters in the name of Jim Whitman. I'm going out of town now, but I'll be in to collect them Tuesday."

"All right," Nora said, slowly. He paid her hurriedly and pushed his way out through the glass doors. Nora stood for a long minute, lost in thought, watching his figure as it disappeared down the street. Nora was thirty-five, an age when a girl appraises strange men with quick, penetrating eyes. What she saw was good. Some girl, she mused, is going to be awfully happy in this summer resort. It could easily be—

Suddenly she became very busy. The minutary of her time-worn duties evaporated. A smile hovered about his lips the rest of the day. Monday afternoon found her positively gay. Tuesday morning found him still happy, but strained. It was nearly closing time of that day when he stood again in front of the glass doors, obviously torn with indecision. Finally he shouldered his way through and approached her.

"I have your letters, Mr. Whitman," Nora told him quickly, thrusting several assorted sizes of envelopes over the counter. He hesitated.

Fumbling, almost unwillingly, he began to open them. At last he beckoned to her.

"Look at this!" he exploded. "Not a single one of these women is any good! Did you ever see any-

thing like it?" Nora was sympathetic to just the discreet shush. "Perhaps you didn't use the right words," she consoled him. "Why don't you try again?"

The young man brightened immediately. "That's a good idea. Perhaps you can help me write a good one."

"I can try," Nora offered amiably. "I'll tell you what," he burst out, boyishly leaning over the counter. "Suppose you and I have dinner to-  
gether tonight. Then we can discuss this matter more fully."

Nora yielded after a lady-like show of reluctance, and the two departed together at closing time.

Nora's mature but rather handsome features were beaming. Then one day she noticed her department manager's office. Being a very perceptive person, he frowned as he saw her ring finger flash in the finger.

"Don't tell me that I'm going to lose my star want-ad saleslady!" he cried.

Nora nodded happily. "I overdid the salesmanship this time. I am a married woman."

Nora and Jim were married the next day. They were married immediately, dousing an old shoe hurried by the boss himself. Jim lost to her. However, the farmer was not un-  
settled. Half a dozen times he spent enough time to speak, then shut it again.

Nora giggled. "Jim," she coaxed, "are you going to spend half of your life in agony, trying to make up your mind to talk to my wife?"

He grinned at her uncertainly. "I've got just one secret I must tell you. Then we'll start our life as an open book. Promise you won't get me?"

Nora nodded wonderingly. "Well," he grunted, "I never intended to find my wife by that ad at all. I was just using it as a chance to talk to you. I saw you were a girl, and I liked you."

He smiled at her. "I spent three days outside that door, trying to get enough nerve to come in. Finally I thought up that scheme."

Nora's startled expression dissolved into a laughing, uncontrollable laughter. Even Jim was affected by her mirth and joined in. Finally she stopped, wiping her eyes weakly, she put her hand on his arm fondly.

"I have a confession to you," she told him. "I owe you a refund."

"Digging in her purse she counted out the money he had paid to her the first day. "Here, darling," she said. "This belongs to you."

Jim looked at the cash arched to a stop. "You mean," Jim cried, "you mean nobody answered that ad at all?"

"Yes," Nora said, demurely. "I did. But I was in a good spot to see that nobody else could answer."

Nora was Jim's turn to laugh. (Copyright 1937 Newspaper Syndicates)

**Rust Becomes Major Menace to Sunflowers**

WINNIPEG.—Rust, always a problem for grain-growers, has become a major menace to the sunflower growers who once had one of Manitoba's most promising industries.

In the rich farmlands of the Altona district 55 miles south of here many sunflowers rot in the fields abandoned by growers. A \$1,000,000 plant at Altona works far below its capacity.

This plant processed sunflower seeds into cattle feed, shortening stalks. The hulls were compressed into replacer loops. Ready markets for sunflower products brought new prosperity to the district, and land values almost doubled since the industry started a few years ago.

Now a decline has set in, with rust mainly responsible, although other causes have been found growing seeds and insect pests.

Manitoba had 26,000 acres under sunflowers last year, but this year's planting was estimated at only 5,000. Efforts have been made to substitute other oil-bearing crops, such as rape seed from Argentina, soybeans and safflower, a relative of the thistle. Experiments with these and other crops may prove useful, but the best solution lies in creation of a rust-resistant sunflower. Research and plant-breeding to this end might require years, and meantime the sunflower industry suffers. 3900

MARLENE STEWART, Ontario's 18-year-old wonder girl successfully defeated the Canadian Women's Close golf championship and retained the coveted trophy which she won last summer. Marlene holds a four year record with a 54 hole medal score of 229, 12 strokes under ladies' par at the Mairfair course in Edmonton and 12 strokes better than the old record.

## Methods Of Harvesting Sweet Clover Are Very Important

WINNIPEG.—Sweet clover has become an important seed crop on the prairies in recent years. Harvesting methods are of great importance since poor handling results in an unnecessarily high loss of seed. Sweet clover should be cut with either the swather or binder when about two-thirds of the seed has matured.

If the seed crop is left standing beyond this stage, some of the early seed will begin to drop, generally resulting in a greater loss. The main principle behind methods of harvesting is that the material be handled as gently as possible, says J. E. R. Greenhalgh, Forage Crops Laboratory, Saskatoon, Sask.

Standard swathers may be used to cut sweet clover. The farmer must first consider what size of swath his combine will be able to handle. A heavy under-cutter is very heavy it is possible to handle a 16 foot swath with a 12 foot combine. When the swath has had time to dry thoroughly, it is then picked up by the combine. If the seed is not fed into the combine very well. The difficulty may be overcome by having a man sit on the front of the combine with a long pole or hockey stick. Some farmers have mounted this problem by mounting a small auxiliary reel directly in front of the conveyor from the elevator platform to the first feeder. If possible considerable seed can be saved by swathing and picking up in damp weather.

When swathers and pick-ups are not available the sweet clover can be harvested satisfactorily with a grain binder. The binder should be set in long narrow strokes. Some shattering of the seed normally takes place during harvesting. A shallow pan or box, attached to the frame of the binder under the opening between the table and elevator can catch the seed that falls on the table canvas.

When threshing with an ordinary grain separator, best results are generally obtained when only one row of concave teeth is used and when the concaves are set well away from the cylinder. If most of the pods are left on the seed the cleaning of the seed is simplified.

Straight combining of sweet clover seed has not improved satisfactorily as much as the seed has dropped by the time the stems are dry enough to combine.

In summing up, harvest at the proper stage and handle the material as little and gently as possible.

**Seventh Series Of Bonds Will Go On Sale In October**

OTTAWA.—The Finance Department said Canada's seventh series of 14 million 30 years and nine months bonds will be issued and bear interest at the rate of 3.44 per cent, if held to maturity.

Canada Savings Bonds of the sixth series launched last year had an effective average yield of 3.21 per cent, if held to maturity.

The department said the maximum unit holdings in any one name remains at \$5,000.

**ERA DISAPPEARING**  
BARREHEAD, Alta.—Remnants of the horse-and-guy era are disappearing from the local scene. Later to go is the Hoffman ivory barn, which will be replaced by business premises.

**Do You Know That . . .**  
Longest plant known is the giant seaweed growing on the coast of California. The weed often reaches 900 feet in length.

**THE TILLEN**  
"I HUNK REALLY SURPRISED ME. I WAS INVITING ME TO A MOVIE."

"I HOPE I DIDN'T KEEP YOU WAITING."

"OH NO, I WASN'T WAITING FOR YOU."

"I COULDN'T ENJOY MYSELF WITHOUT YOU."

"WHY HUNK YOU MEANT THAT?"

"I'LL SAY! THE USHER ALWAYS PICKS OUT THE SEAT I'VE A PRETTY GIRL IS ALONG!"

## Prairie Plant Breeders Have Extended Range Of Ornamental Shrubs And Produced New Types

The range of choice in ornamental shrubs is being greatly extended by plant breeders. Horticulturists at the Central Experimental Farm, Ottawa, have made many contributions in distinctive new hardy shrubs. In recent years efforts on the prairies have also been considerable and fruitful.

Apart from Experimental Stations such as those at Indian Head, Sutherland and Morton, private citizens such as Dr. F. L. Skinner, Percy H. Wright, Georges Bugnet, R. Simment and M. K. Muckle, have been to the fore in shrub breeding.

In reporting on the work done at the Morton, Manitoba, Experimental Station, Superintendent W. R. Leslie mentions some of the notable new introductions. The Almay crabapple of the Rosyblom class is a hybrid winning popularity. The vigorous tree bears bright red flowers annually. The small scarlet fruits are retained on the branches all winter un-  
less eaten by winter birds.

The Prairie Almond, from a small Oriental almond mother and by double-flowering plum pollen in commerce, is to be rated as more valuable than the almond. It has a double-textured bush with small narrow leaves is abundantly floriferous. The double pink flowers with red centres are succeeded by interesting red nuts. The fruits add interest to the subject.

In hybrid bush roses, Prairie Wren and Prairie Youth are distinctive. Prairie Youth is a growthy shrub which bears many rich salmon pink, double, fragrant flowers in June and July and a few thereafter into September.

In the late hybrid lilies, Coral pink, Ruby, and pink, Redwine with cerise and freedom with great abundance of pale, pinky-lilac flowers appear to be valuable additions to Prairie arbutheons.

Tidy caragana with narrow ferny foliage appears in Southern Manitoba as more healthy than Lorberg caragana to which it carries resemblance although it arises from a different species.

Prairie plant breeders, says Mr. Leslie, are busy on many kinds of shrubs and vines. They are counted upon for a wide array of further varieties of distinction during the next decade.

**FOR FUTURE ANGLING**  
PRINCE ALBERT.—The Saskatchewan Fisheries branch recently completed stocking of 9,000 eastern brook trout in the 150 square miles of the province. The fish were released in suitable streams in the Moose, Peace, and Assiniboine, Hudson Bay, Big River, Lac la Ronge and Norway rivers. They are expected to reach angling size in 1964.

**Mrs. Lauritz Melchior Puts On Blue Bonnet To Get F.N.E.I.**

SWIFT CURRENT, Sask.—The Swift Current Boys' Band, which salvaged some of its first instruments from ash cans, and through constant effort has gained international fame, has left for eastern Canada, where the young musicians will give numerous concerts and compete for national honors at the Canadian National Exhibition.

**Seen in Manitoba**  
WINNIPEG.—Evidence that some of the world's vanishing whooping cranes may nest in northern Manitoba has been reported by Ducks Unlimited. Officials of the group said some of the distinctive, big white birds with black wing tips—whose world total is believed less than 35—have been seen about 170 miles northwest of here in the Lady Lake-Turtle River area.

**Additional Grant**  
FLIN FLON, Man.—Additional grants of \$42,000 to the town of Flin Flon by the Hudson Bay Mining and Smelting Company have been announced by Mayor Cyril Stevenson. The grant will be used to make final payments for sewer and water extensions in subdivisions. Cost of the project was \$1,500,000.

GLEICHEN CALL

**HERE AND THERE**

The first load of this year's grain delivered on an elevator took place last Saturday. The grain was barley and came from the Blackfoot Indian Reserve. The field containing this grain ran 40 bushels to the acre and weighs 57 pounds to the bushel.

The Gleichen F.W.U.A. held a regular meeting at the home of Mrs. E. Johnson with some 10 members and six visitors present. The roll call was answered by "Hi and Wisdom." Mrs. G. McEwen occupied the chair. After the usual business Mrs. Fred Hanks read a paper on Civil Defence and Mrs. McEwen read the finding of The Woods Christian Home. Mrs. B. McEwen was placed in charge of making the satin quilt. After the meeting two coffees were put on and were much enjoyed by all. A tasty lunch served by the hostess and helpers followed.

Three generations of Poorman, Mr. and Mrs. Bert Poorman, their son Edsel and his son Lawrence all of Spokane, Wash., were guests at the home of Mr. and Mrs. W. F. Erford recently. Mr. Poorman is Mrs. Erford's brother.

Mr. and Mrs. Scotty Murray and children have returned home from spending a month's holiday in British Columbia. They spent most of the time at Nelson and vicinity visiting Mrs. Murray's relatives. Scotty spent many hours fishing and had wonderful luck landing brook trout.

Are you having troubles? Let a Want Ad help you solve them.

Mrs. Leona Thomas of St. Mary's, Kansas, and son Floyd of Topeka, Kansas who were visiting relatives in the Gleichen district and also Calgary have left for their homes. Thomas is a sister to A. F. Wilson and Mrs. A. Quinell.

Doctor: "How is the patient this morning?" Nurse: "I think he is regaining consciousness. He tried to blow the foam off his medicine."

Always remember: you may not call a woman a kitten, but you must not call her a cat.

You may call her a mouse, but you must not call her a rat.

You may call her a chicken, but you must not call her a hen.

You may call her a duck, but you must not call her a goose.

You may call her a vision but you must not call her a night.

Statisticians, reporting that sport fishing is big business in Canada, estimate it is worth an annual \$80,000,000 annually.

(Continued from page 1)

**THE SEARCH FOR BEAUTY**

or a profound faith, are eternal possessions.

We cannot, of course, retain everything in our own personal storehouse of beauty. Something that we find shining with beauty at one time we may find later has lost interest for us; this holds true for people and paintings, books and memories. There is an interesting variation of this. As time passes, and we undergo wider and more varied experiences, we can and do return to people and to art and discover new beauties and new values which we did not see in earlier years.

Art may sometimes disappoint and confuse us, but nature never. The effect of natural beauty is to elevate us to a higher level. We cannot look upon a great natural scene, a serene time river, a snow capped mountain, or a green and gentle meadow without feeling remote from our personal pettiness. Sometimes we are almost barbarous in our disregard of nature's beauty. The man who takes a motor trip with the sole idea of covering so many miles a day, and arrives at his destination with mingled memories of the country he has sped through, is not only ignoring a source of physical relaxation but he is rejecting balm for his eye and his spirit. To catch a record breaking number of trout in a day is not as soul-satisfying as to enjoy the mental peace and physical joy of a clear stream and the cloistered calm of tall trees.

Beauty plays a very important part in business. In practically all goods produced for sale there must be an appeal to the eye or ear. Advertisements, displays, shop windows and billboards, as well as the actual products themselves, concentrate on this and so create a desire to possess the goods. Everything from automobiles to book jackets and bacon wrappers is designed to appeal to the consumer's aesthetic sense in addition to more overtaken considerations.

It is true that we can create an atmosphere of beauty and grace with the wealth of goods that modern ingenuity and manufacturing have developed and perfected but the very

first seeds of beauty lie within ourselves.

If we cultivate the many attributes of beauty in our relationships with our families and associates we can achieve a happiness and a spiritual content such as no possession of material goods can give us. The understanding eye the appreciative ear, the open mind and the generous heart are not only blessings to us who possess them, but their benefits extend to all those whose lives touch ours no matter how slightly. By beautifying our social and domestic existence we can all be artists in life.

We can educate ourselves intellectually and spiritually to see the maximum of beauty . . . in the world of nature, of art and of human beings. By this aesthetic education we will achieve not only that genuine sense of steadfastness and resource which is perhaps the kernel of happiness but a new joy and meaning in living. It is a fundamental truth that nothing but the good enters into the soul. In this largest sense of the word, beauty—the yearning for it, the search for it, and the contemplation of it—has civilized mankind.
